About Me

I am a Computer Engineering student who values self-improvement, is innovative, and solution-oriented. I specialize in mobile application development, producing user-friendly and functional solutions. Using React Native, I have developed projects and gained skills in team leadership and project management.

My goal is to contribute to large-scale projects, continuously improve myself in the software industry, and deliver innovative solutions.

Work Experience

Mobile Application Developer, CODE23

February 2023 – July 2023

- I developed mobile applications using React Native, focusing on producing user-friendly and functional solutions.
- I enhanced application designs using Figma, increasing user interaction and visual harmony.
- I led a team of 5 in designing and developing a mobile application for a company.
- I successfully completed the program and received an e-devlet approved certificate, verifying my technical skills and contributions.

Projects

University Appointment System

- I participated in the development of a mobile application to simplify appointment processes for university students and staff.
- The backend was coded using Node.js, while the frontend was developed with React Native.
- As the team leader of the project, I coordinated multiple developers, managed task distribution, and directed the progress of the project.

TÜBİTAK 2209-A: Accessible Places Finder

- I developed a mobile application to help individuals with disabilities discover accessible locations.
- The application was written using React Native, designed with a Firebase infrastructure, and visualized with Google Maps API.
- I successfully completed the TÜBİTAK-supported project within the designated timeline, achieving the project goals.

Education

Bachelor's Degree

September 2022 – June 2026

Firat University

- Computer Engineering

Key Skills

- React Native
- Node.js
- JavaScript
- CSS
- Java
- UI/UX design with Figma
- Problem-Solving
- Organizational and Time Management Skills
